

## DATA SHEET

# S-305

| MODEL      | S-305 with Bayonet Cap                   |
|------------|------------------------------------------|
| VOLTAGE    | 6V                                       |
| MATERIAL   | Polypropylene                            |
| DIMENSIONS | Inches (mm)                              |
| BATTERY    | Deep-Cycle Flooded/Wet Lead-Acid Battery |
| COLOR      | Black                                    |
| WATERING   | HydroLink™ Watering System               |

Not available in the USA, Canada, Dominican Republic or Haiti

## Silver Line

#### **PRODUCT + PHYSICAL SPECIFICATIONS**

| Model | Terminal Type <sup>E</sup> | Dimensions <sup>c</sup> Inches (mm) |            |                     | Weight Lbs. <sup>F</sup> (kg) | Handles | Installation Orientation |         |
|-------|----------------------------|-------------------------------------|------------|---------------------|-------------------------------|---------|--------------------------|---------|
|       |                            |                                     | Width      | Height <sup>D</sup> |                               |         |                          |         |
| S-305 | 4                          | 12.35 (314)                         | 6.85 (174) | 14.41 (366)         | 83 (38)                       | 83 (38) | Braided Rope             | Upright |

#### **ELECTRICAL SPECIFICATIONS**

| Voltage | Capacity  | <sup>A</sup> Minutes | Capacity <sup>8</sup> Amp-Hours (Ah) |       |       | Energy (kWh) | Internal Resistance (m $\Omega$ ) | Short Circuit Current (amps) |   |
|---------|-----------|----------------------|--------------------------------------|-------|-------|--------------|-----------------------------------|------------------------------|---|
|         | @ 25 Amps | @ 75 Amps            | 5-Hr                                 | 10-Hr | 20-Hr | 100-Hr       | 20-Hr                             |                              |   |
| 6V      | 624       | 155                  | 242                                  | 271   | 295   | 328          | 1.77                              |                              | _ |

#### **CHARGING** INSTRUCTIONS

| Charger Voltage Settings (at 77°F/25°C) |                    |                                  |                                                            |  |  |  |
|-----------------------------------------|--------------------|----------------------------------|------------------------------------------------------------|--|--|--|
| 6V                                      | 12V                | 24V                              | 48V                                                        |  |  |  |
| 13%                                     |                    |                                  |                                                            |  |  |  |

Do not install or charge batteries in a sealed or non-ventilated compartment. Constant under or overcharging will damage the battery and shorten its life as with any battery.

\*If charging time is limited contact Trojan Technical Support for assistance.

\*\*In cases where controller has a bulk voltage setting, use absorption voltage setting above.

#### **CHARGING TEMPERATURE** COMPENSATION

| Add                                           | Subtract                                      |
|-----------------------------------------------|-----------------------------------------------|
| 0.005 volt per cell for every 1°C below 25°C  | 0.005 volt per cell for every 1°C above 25°C  |
| 0.0028 volt per cell for every 1°F below 77°F | 0.0028 volt per cell for every 1°F above 77°F |

#### OPERATIONAL DATA

| Operating Temperature                                                                                               | Self Discharge                                                 |  |  |
|---------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------|--|--|
| -4°F to 113°F (-20°C to +45°C). At<br>temperatures below 32°F (0°C) maintain a<br>state of charge greater than 60%. | 5 – 15% per month depending on storage temperature conditions. |  |  |

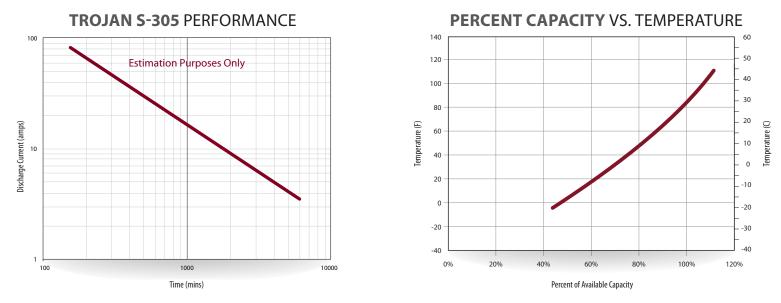

### STATE OF CHARGE MEASURE OF OPEN-CIRCUIT VOLTAGE

| Percentage Charge | Specific Gravity | Cell  | 6 Volt |
|-------------------|------------------|-------|--------|
| 100               | 1.277            | 2.122 | 6.37   |
| 90                | 1.258            | 2.103 | 6.31   |
| 80                | 1.238            | 2.083 | 6.25   |
| 70                | 1.217            | 2.062 | 6.19   |
| 60                | 1.195            | 2.040 | 6.12   |
| 50                | 1.172            | 2.017 | 6.05   |
| 40                | 1.148            | 1.993 | 5.98   |
| 30                | 1.124            | 1.969 | 5.91   |
| 20                | 1.098            | 1.943 | 5.83   |
| 10                | 1.073            | 1.918 | 5.75   |

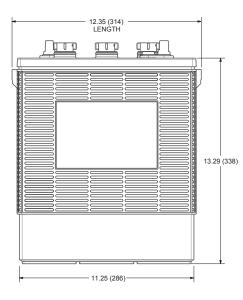

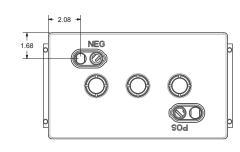

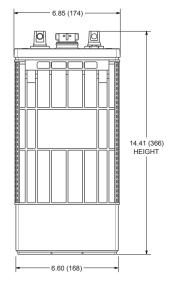

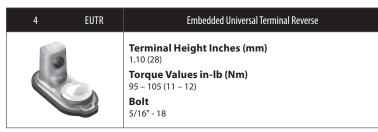

#### **TERMINAL** CONFIGURATION

The number of minutes a battery can deliver when discharged at a constant rate at 80°F (27°C) and maintain a voltage above 1.75 V/cell. Capacities are based on peak performance. The amount of amp-hours (Ah) a battery can deliver when discharged at a constant rate at 80°F (27°C) and maintain a voltage A

В above 1.75 V/cell. Capacities are based on peak performance.

- C. Dimensions may vary depending on type of handle or terminal. Batteries should be mounted with 0.5 inches (12.7 mm)
- spacing minimum. Height taken from bottom of the battery to the highest point on the battery. Heights may vary depending on type of terminal. D. Terminal images are representative only

E. F. Weight may vary.
